JARP Industries Expands its JARP/RE Cylinder Remanufacturing Program with Opening of New 25,000 Square Foot Manufacturing Facility

Wausau, WI...JARP Industries, a leading manufacturer of custom hydraulic cylinders, has opened a new, stand-alone manufacturing facility for its growing cylinder remanufacturing business. The 25,000 square foot facility, opened as part of JARP's long-term commitment to cylinder remanufacturing, is dedicated solely to its JARP/RE remanufacturing program. According to CEO Kevin Kraft, "JARP Industries has extensive remanufacturing experience, and these expansion efforts will allow JARP/RE to support the remanufacturing needs of a broader base of customers and markets."

The new facility will provide JARP/RE with the capacity to remanufacture up to 20,000 cylinders a year significantly expanding its existing capacity of 7,000. In addition, it now gives JARP/RE the ability to offer its remanufacturing customers customized inventory programs.

Incorporated in 1959 in Wausau, WI JARP Industries designs, manufactures and remanufactures custom hydraulic cylinders and other fluid power products for equipment manufacturers in several industries. With two manufacturing facilities totaling 150,000 square feet, JARP produces over 40,000 custom hydraulic cylinders per year. JARP is ISO 9001:2008 registered and is a member of the National Fluid Power Association.
